### ABSTRACT

This alumn survey evaluates Alcorn State University by two different methods. Objective data concerning the students subjective ratings of Alcorn furnished the second means of evaluation. The classes of 1971, 1972, and 1973 were utilized as the particular alumni group to be studied, with 1,428 alumni being sent questionnaires and 446 alumni responding. This represents 31 percent of the population surveyed or 33 percent if one eliminates the number of questionnaires returned with insufficient addresses. (Author)

### INTRODUCTION

The purpose of this Alumni Survey was to evaluate Alcorn State University, by two different methods. Objective data concerning the students' present accomplishments provided the first type of evaluation while students' subjective ratings of Alcorn furnished the second means of evaluation. These two types of evaluation should provide valuable information in making Alcorn a more viable institution of higher education.

The classes of 1971, 1972 and 1973 were utilized as the particular alumni group to be studied. 1,428 alumni were sent questionnaires and 446 alumni responded. This represents 31 percent of the population surveyed or 33 percent by eliminating the number of questionnaires returned with insufficient address. This percentage of return appears to be a reasonable one and is sufficient in interpreting the data. Also, the distribution of alumni responding is approximately equal for each of the three years represented.

### PROCEDURE - ALUMNI FOLLOW-UP

proliminary research emphasizing the procedures of several surveys apposite to the Alcorn Alumni Follow-up Study to be performed was conducted by Dr. James W. Williams, Director of Institutional Research at Alcorn State University. Following his investigation, he devised an appropriate instrument to be utilized in this study and selected the graduated classes which could probably provide the most relevant information. Lists of the names and addresses of the graduates of classes 1971-73 were obtained from the Office of Alumni Affairs and the Registrar's Office. Between May 23 and June 3, 1974, a questionnaire along with a letter requesting that the questionnaire be completed and returned in the enclosed stamped self-addressed envelope were mailed to each of the 1,428 persons whose names appeared on these lists. (See Appendix) for copies of the questionnaire and letter.)

As the questionnaires were returned, those indicating a change of address were added to the list of graduate addresses and the former does discard Also compiled were the names of 84 graduates whose questionnaires were returned by the postal system because the addresses to which they were mailed were incorrect.

By July 8, only 200 questionnaires had been completed and returned, 35 of which were anonymous. Because of the poor and seemingly terminated response by that date, on July 10 and July 15-18, a second copy of the questionnaire enclosed with a new cover letter and self-addressed envelope were sent to the 1,179 persons whose questionnaires had not been returned, or, if they had been,

were anonymous. A list of graduates whose wrong addresses appeared in our records was also included in case the person receiving this correspondence knew, and could provide any correct ones. (See Appendix for copies of these documents.)

As they were supplied in the returned follow-up questionnaires, the correct addresses were recorded for graduates whose wrong addresses were on file.

Questionnaires were then sent to the correct addresses.

when the number of returns per day began to show a substantial decrease, steps were taken toward the finalization of the study. A coding system was formulated and the information provided by the graduates, with the exception of questions 12-16 (on the education of presently enrolled full-time graduate students) and question 27 (concerning suggestions for improvement of Alcorn's educational program) was recorded on computer data sheets. All of this information was carefully compiled, categorized, and evaluated in the Office of Institutional Research. (Persons whose comments revealed their need for employment assistance were immediately reported to the Alcorn Placement Office.)

Two hundred forty-seven questionnaires were returned after the second mailing (46 more than the 200 received after the first mailing) making a total return of 446: Changes in last names and corrections to be made in addresses accumulated from the returns were sent on September 17 to the Office of Alumni Affairs and Registrar's Office for future reference.

### COMMENTS

### EDUCATIONAL PREPARATION

Offer night or evening classes so more working people will be able to attend college.

More emphasis on major studies and less emphasis on electives. Broaden areas of concentration.

By adding more computer courses to the Business Education Department. Also more equipment to work with in the office machine course.

More practice than theory.

I feel Alcorn could prepare its students to live a more "productive and rewarding life" by improving its curriculum, validating and installing them. Perhaps then and only them can Alcorn meet up to its true "tradition and students will be more content."

Being aware of students interests and desire (knowing what each student wish to obtain from a course and help him meet that goal).

B roadem areas of concentration (General Science majors, Recreation as major, area of study).

I think they should began so that students could continue to get their masters.

Open up an area in speech and drama and a program for securing masters.

Put more emphasis on programs directly related to students' area of concentration

When I attended in 1972, there were few courses in Psychology and little in the arts and architecture. In think Alcorn-could add additional courses that would benefit persons having that interest.

More emphasis should be placed on the basic science courses, especially for students interested in related science areas. Students should also get more counseling in regards to going into other professions, rather than just those of teaching.

By trying to offer a master's degree program in as many areas as possible.

Extensive counseling, allow education students more practice in teaching methods.

More professional teachers, disson firm in 1 to 30 of 36 students, more quidance counseling, more emphasis on techniques and fundamental. In business courses.

Enter into major field of study sooner and in more detail. Consider more time in major field (three years in major, one year on educational basis).

By offering courses that are in line with current world trends - energy shortage pollution and environment. Also give students a greater variety of areas to

Offer more areas in which one could major; offer more courses in the major areas of study.

Hire more blacks, hire Alcornites with doctorate degrees. Improve staff and celationship.

Improvement of health services, counseling, food services, placement and recreational facilities.

Stronger means of motivation.

Broader range of electives offered in a specific major and some instructors definitely needs to become more conscious of the importance of planning as related to individual needs.

There should be principles set and strictly adhered to in order to get movement

By adding courses that will better benefit the student for his career.

Offer more professional courses.

More courses in law enforcement and medicine

Broaden curriculum in subject areas. Provide counseling and guidance that is so badly needed. Establish departmental libraries and build a better central library system.

Broaden the range of course selection and major fields.

A broadening of the curriculum to make it possible for the prospective student to choose a specific field of study.

Offer courses on the duate level.

Master's Program and eventually specialist and doctoral. Counseling department, referral center and broaden recreational activities.

Began a graduate program.

Business Department classrooms are very uncomfortable, clammy and overcrowded.

Employ more persons with doctorate degrees to bring the University in line with others with university status.

Add a professional program as well as the teaching curriculum (pre-dental, pre-med, pre-law).

Give the Elementary Education major some Phonics so they will know how to teach children to read by using sound.

I have had friends in the last few years to receive B.S. degrees in various majors at Alcorn and leave the "state of Mississippi" and find that they had to take courses before receiving a teaching certificate in another "state" because they are not adequately prepared. "Alcorn's course of study should be more closely related to other universities." Everyone that attends Alcorn doesn't necessarily plan on residing in the state.

More qualified teachers and better teaching facilities. Set up a program that will educate students in more than just the three "R's." Algorn students should be exposed to current trends and new developments.

Offer more specialized courses,

Since Alcorn is a university, convert the Educational Divisions (College of Business Administration) into colleges and in this process, add new courses such as engineering, nursing, architecture.

Establish a more specific curriculum related to the occupation one chooses set up trades for individuals who want to attend for four years or less.

A greater improvement in the choice of majors and minors for the students.

Try to incorporate U.S. History into all curriculum. The college should also require all students to have at least one or two minor subject areas should they happen to have to settle for alternate job opportunities they have something to rely upon.

By being a little more concerned about what students need, not want.

Offer more updated courses in the English Department.

Offer more current courses in each department. Offer tutors to slower students by using more advanced students as tutors.

Develop independent study courses, and correspondent study courses.

Expand all aspects of educational selections open to an individual with adequate emphasis in the field of speech and theater and art.

A specialized educational program to meet the needs of available jobs.

Free coaches from teaching in the Physical Education Department.

Offer more electives in each curriculum.

If more influential guest speakers from all walks of life were on campus to address the student body and specialized classes, it would greatly increase the students' quest for perfection by example.

Alcorn could improve its educational programs by comparing its educational curriculum with other universities outside the state of Mississippi.

On the job training for those not entering the teaching profession, or through a work experience type program, if this is not being done at this time.

Constantly reevaluating its educational programs and comparing it to other institutions of learning.

Initiate field experience during the junior year to continue through senior year. Concentrate on more research. Active involvement and evaluation of educational materials. Careful selection and acceptance of program participants. Educational building; housing classrooms, laboratory, and other facilities. Spend less time on general courses and more time on major educational courses. Student involvement in planning the goals and curriculum. Seminars for student teachers during their training and not just afterwards. More guest lectures in area of study.

Include more major courses in the place of general work such as civilization. Demand more classroom instruction from teachers.

Classrooms should be better equipped with educational materials relevant to the subject being taught so that the learning experience becomes a more active process.

A variety of related courses and instructors in departments.

Alcorn could greatly improve its educational programs by expanding its depth in space and concentration offered. More equipment is needed to provide graduates with better education.

I suggest that the school develop programs more related to working directly in the student anticipated profession. Such an example is preparing him for what is really needed on student teaching instead of so many useless and unrelated fundamentals.

Add more and better courses to the curriculum and employ teachers interested in welfare of students as well as salary.

In the area of Home Economics, I think more advanced equipment will help, such as textile machines and modern kitchen equipment.

By starting a graduate program as soon as possible so I can return.

A graduate program would improve Alcorn's educational program.

Broaden curriculum to include courses on Research Methology as basic courses in the Social Sciences also writing composition at an upper level should be required.

More indepth concentration in major area of studies.

I think Alcorn State University is doing a tremendous job in improving its .

To concentrate in courses that would able the students to qualify for employment other than teaching.

Offer graduate courses.

I think they should seek instructors with favorable interest toward the university and students.

To arouse interest, the university must have something for everyone. To broaden the curriculum would do wonders for the university and the student body as well as increase the student body.

As Alcorn State University strives to be the best institution for educating its students, the primary concern should be in each department to fully equip the departments with up-to-date facilities and instructors who are there to develop a positive interest in the student's learning potentials. As far as the Business Department is concerned, it is far behind with its machines as compared to some high schools in Mississippi.

Broaden the curriculum and make the classes smaller.

More courses for Education majors on how to prepare, registor more courses in Reading (sound of letters, phonics, vowles, and other reading courses).

Curriculum which will prepare a student for job performance.

Each department should become more specialized in the majors that are offered instead of the various general majors that are offered.

Having and getting some type of graduate program and work closely with the Alumni Association.

"ry if possible to offer graduate study.

Offer more vocational training because when a student gets out of college with a liberal education, the jobs are so hard to find. But if the student has professional training in vocational education, there might not be such a problem

Improve students in English and vocabulary.

Specialize in more areas ans start the master's program.

Add curricula that are not common to every university in the state. Raise students performance standards, improve library-more books, equipment, etc. As badly as the students need it, the library should be open all day and all night. (There are some other, too like everyday of the week). Bowles Hall, that should be at the students' access for research at any hour. More money should be spent in other areas besides Health and Physical Education. The school should be known for more than its athletes. The school should employ or assist in the employment of students with high grade point averages as tutors for other students who need and desire remedial instruction. Master's degree programs in all major areas should be set up as soon as possible. Do not employ coaches as classroom instructors. They miss too many classes. Allow students to evaluate their instructors at least twice a year, and heed results. There should be many more guest speakers to address certain departments on their recent research endeavors. (Althouh only a few departments may be specifically invited to attend, sessions should be open to all.)

I think a Department of Recreation should be established providing those individuals interested in pursuing a careerain Recreation. This field is opening up to Blacks.

Include U.S. History in the program of Elementary Education as a required course, so that students that go to other states will not have a deficiency in certification.

### FACULTY PREPARATION

Addition of faculty members to various departments.

Alcorn teachers do a very fine job teaching their students and many of them gain from it, but majority of the students don't know the value of learning and they don't learn much as they should because they can copy. So Alcorn should stress more on the value of education.

More concerned staff to deal with problems of students.

Receiving more instructors with doctorate degrees for master study program.

Alcorn could better expand or improve its educational program by making an effort to find more dedicated instructors.

Integrate the faculty with whites.

By getting away some of the old faculty members like ... for instance....
He has a very disposition as a .... He has ways of downing people and never giving them a chance to express their feelings about anything nor any opinions. When you get rid of him the school will be much better especially the ... Department. I MEAN EVERY WORD.

Keep so many non-American teachers who can't speech English well from teaching so many courses that require clear and pronounciation.

Paculty should take more interest in their profession and strive to give each student what he or she pays for.

I suggest that you get a better recruiter program to gain more students and get a faculty with more doctorate degrees.

Get more teachers that have Ph.D.s in order to have a graduate program for those at least, in the community, that are interested in attending.

More dedicated teachers.

To improve the faculty and staff with people of higher degrees and new ideas that will help improve the curriculum.

More concerned teachers.

Do not employ any more people like ..., ..., and .... There are too many .... My reason for listing these persons are they are crazy, too eacy, and do not know what they are doing.

Upgrade the faculty members.

Closer screening of faculty members.

Improve the faculty with better and more broad minded and interested instructors.

Secure more and better qualified instructors.

I think if Alcorn's faculty would get down on their students and make them study for their grades it would help.

Too many foreigners instructors.

Employ more doctors into the Business Department.

Frankly, I wish all the teachers would do the jobs they were hired to do. I realize, since I've been out of college, what a waste it is to be given a grade rather than be made earn it.

More firm faculty to insist upon lessons.

The teaching staff in various departments be evaluated.

Employ less foreign instructors, more equipped laboratories.

Convey or get rid of sterotype instructors and administrators. Let administration and instructors teach to the trend of individual students (factors as race, location and background) rather than following the trend of larger universities.

Remove teachers who have no interest in students,

Increase the ratio of faculities with Ph.D. degrees.

Employ more former Alcornites who understand the school and the needs of the students.

Observation from the faculty standpoint, I feel that the University should hire persons (instructors) who are stable and sincere in their teaching efforts.

### PLACEMENT

Yes. When I first got out of school, I wrote the Placement Center to help me find a job. In three years, I have not had any response from them. Is that the way to act as a Placement Center for Alumni? It definitely needs improvement and also more courses in the Business Department field pertaining to court room secretaries, legal work, accounting. These fields are widely opened. Also courses such as data processing, insurance, and programming.

I think that we should think less of the Business Education field as just teachers, simply because teaching jobs are not promised to a person.

Office of Placement should try and find join for graduates within the state.

Help graduates to seek employment after graduating from the university.

Improve Placement Office for helping former students to get jobs of their qualification.

There is a need for a thorough follow-up of placement of graduates. It is difficult for former graduates to obtain certain things (example: yearbooks from the university).

Work with Port Gibson Employment Office so its members will know about openings far and near.

I have called Alcorn College three times searching for employment through the Placement Office but I have not received an answer and I think a better communication could be developed for former graduates.

Placement Program needs to help its students or should I say give more support to its graduating students. Should began placement proceedings at the beginning of the senior year, no later than the beginning of the second semester of the senior year.

Improvement in Placement Program.

### COUNSELING PROGRAM

The teachers should be a little more concerned for students. Also, Alcorn needs some more counseling. Someone the students can talk to. Alcorn should be interested in the whole person, not grades or position.

I think there should be more counseling made available to the students so that they will know what fields are crowded out. Then they should be encouraged to major in the less crowded field.

Provide more counseling for students especially transfer students. (Students should not have to wait until graduation to find that they need certain courses before receiving their degree.)

More counseling.

To initiate a good counseling program and plan the programs of study to give more choices of courses to choose from.

More time spent on counseling students in preparation for future careers.

Students should be counselled more on their field of interests.

Take more time with each student separately.

Greater care should be taken to direct students into fields, with maximum job and promotional opportunities.

T he counceling of students is extremely inadequate.

More counseling for freshmen thru the senior year. I feel this can be accomplished with faculty and student consultants.

Better and true concerned counseling over each department. Faculty members that are really concerned with the students.

Individual counseling needed.

Have more counseling.

Need counseling center.

Better academic counseling.

### ADMISSIONS PROGRAM

Better system needed for registration.

Make effort to insure that one would have the opportunity to prepay tuition by mail and not have to wait in a long line.

Provide financial aid for those who really need it.

When registering, all last names beginning from A-H register 9-12, I-P, 1-5, Q-Z, 9-12 the next day.

Registration procedures need improvement.

The registration system could stand more improvement,

By improving students standards. There should be at least minimum standard of admission procedures not open door policy.

Registration could be improved. When I was there it was a total confusion to incoming new students. It should not be such a hassel.

38

Alcorn should stop letting students handle the grade sheets because so many grades get changed.

### PUBLIC RELATIONS

Public relations should be improved.

### BOOKSTORE

Have textbooks ordered and posted on a list in the bookstore before semester begins.

### FINANCES -

Lower the yearly fees, most people from Mississippi can't afford to send their children to school there, it costs too much to send them for a year and too much for four years.

Demanding more money from government in order to develop Alcorn to its fullest potential.

Better control on your financial aid, give it to students that need it, not to those who say they need it.
